

- The project was done in Java JDK version 11.0.15.1 with unit testing using JUnit.
- **Terminal.java** runs the program. ***Test.java** runs the unit/system/smoke test files. In TerminalTest.java, the unit test void verify_provider() will fail if all the *Test.java files are run simultaneously. If just the TerminalTest.java file is run, it will pass.
- Member and Provider Reports will **not** be created until one of the Manager menu options gets run. Individual Member Report and Individual Provider Report will only do that for the targeted person.
- Weekly Report will create all the files along with the Summary Report and EFT file.
- The files will be stored where the project is stored. The files **might not appear** in the Project/Folder view in the IDE until the session is ended using the option “9” to log out. (Images for reference shown after tables)
